```
80/590 receptor
                                                                 p < 0.01
58/408 transmembrane signaling receptor
                                                                p < 0.05
69/541 calcium ion binding
                                                                 p < 0.1
82/692 transferase, transferring phosphorus-containing groups
85/680 cytoskeletal protein binding
53/410 structural molecule
```

65/514 protein domain specific binding
